## PLEASE NOTE

**A**LL stock offered in this list is on hand at time of going to press. Stock is small in blooming size bulbs of the newer varieties, an early order is therefore advised. Should any stock prove untrue to name we will gladly replace or refund the money. Orders are filled generously, and extras will be added for names of friends to be added to my mailing list. Members of the A. G. S. may deduct 5% from the total of their order. All orders should be received here not later than May 1st, excepting for mixed bulbs. Shall have a long list of new varieties to add to next year's list. If there is a new variety you want the price of write me; if I do not have it on hand I can probably get it for you.

I want to thank all those who last year ordered bulbs of me so generously, and for the many nice things you have written or told of their blooms.

To you who love beautiful colors, there is a way of satisfying that desire completely if you have a place where you can grow some of the choice flowers of to-day. By adding a few new things each year you can soon have a beauty spot of your own making.

Bulbs will be sent in March or April when there is no danger of freezing in transit, unless you instruct us otherwise. Cash should accompany all orders, check or money order. All bulbs are sent prepaid where order amounts to \$1.00 and over.

I think my prices coincide with those of reliable growers.

All stock offered and orders received subject to prior sale, loss by fire, etc.

## Peonies

**T**HE peony is absolutly hardy, and if properly planted in congenial soil and given reasonable care, is sure to thrive and give its wealth of beauty year after year.

September and October are the best months for planting peonies. Peonies usually bloom first season, but size and beauty of blossoms improves from year to year.

Bone meal is the best fertilizer to use about peonies. Don't use manure near peony roots or on top of the plants. It may be dug into the soil away from the plant a little, but not in contact. Plant in soil deeply dug and pulverized. Set so eyes are not deeper than two inches below level of the ground. Too deep planting is often cause of not blooming. Good idea to protect the roots first winter with mound of earth or any trash from garden, or both. Remove this early in spring.

**SIZE OF PEONY PLANTS.** Two to five well developed eyes with good root system will be found on on every peony root sent from our gardens.

## Delphiniums

Choice plants of Wrexham, Kelways and Vanderbilt Hybrid strains, single and double. Only small plants sent by mail. If interested, write for prices in the spring, when I will know how seedlings have wintered.

Local buyers like best to select the plants they want when in bloom and transfer them at once to their own gardens.

Large plants, choice double varieties, \$1.00 each; single, 75c. Smaller plants at 35c and 50c each.

# New Dwarf Dahlias from England

Coltness Hybrids, 12 to 18 inches high, in shades of red, buff, yellow, white, etc., single blooms of good size on long stems.

Mixed colors only, 50c per tuber.

Choice varieties of Hardy Phlox, Pyrethrum, Shasta Daisy, Gaillardia, Chinese Lantern Plant, Violets, Day Lilies, etc.

For fall planting, single, and double in yellow, and white Narcissus.

Send a postal for prices if interested.

All bulbs will be of blooming size, usually  $1\frac{1}{4}$  inch or over. Sometimes if sold out of No. 1 size, I put in two smaller bulbs where only one is ordered.

I exhibited blooms this year for the first time, and at the Am. Gladiolus Society Show at the State Armory, was awarded an A. G. S. silver vase for "the best collection of under 400 spikes."

At the Conn. Gladiolus Society Show my Gladiolus blooms won 7 blue ribbons, 3 red and 2 white.

At the Conn. Horticultural Society Show I made 3 entries of Gladiolus, and won two first prizes. Also a blue ribbon for my Delphinium collection, and a blue ribbon for single Dahlias with my Dwarf English "Coltness Hybrids," which are not very well known in this country as yet.
